

OUR MISSION

It is the Mission of Houston Behavioral Healthcare Hospital to be the regional leader in behavioral health services by developing and delivering metric driven programs and services molded by outcome measurements delivered to those entrusted to our care.

PROGRAMMING

The team at Houston Behavioral Healthcare Hospital is both passionate about quality behavioral healthcare and compassionate about those we serve. We recognize that emotional, behavioral and chemical dependency problems can affect all areas of a person's life. Our individualized treatment programs are tailored to address each person's unique problems and needs. Each patient's treatment team will assist them in finding and using the tools they need to be able to build a healthier, more positive life. Throughout the treatment experience, we work together with our patients and their families to encourage the best possible outcome and ongoing plan for success.

All services have a board-certified psychiatrist that oversees the program and each patient has an attending psychiatrist monitoring the patient on a daily basis. The treatment team also includes Registered Nurses, Mental Health Technicians, Recreational Therapists, Social Workers, and Counselors. Medication and psychosocial interventions are utilized as appropriate for each patient.

Houston Behavioral Healthcare Hospital is a new clinical addition to the metropolitan area. Opening in the fall of 2014, our facility offers brand new “state of the art” inpatient and outpatient services located in a serene, picturesque setting. Our goal is to provide an outcomes oriented approach to our programs by continually refining and improving services based on clinical results.

Whether accessing care for yourself, a loved one, or a person you refer, choosing a provider is an extremely important decision. Our patient-centered treatment approach, combined with a team of clinicians that have a legacy of clinical experience and expertise in the Houston area, is what sets us apart from other providers. Through our own programs and services, as well as our affiliate partner relationship, we provide our patients with a continuum of care that includes inpatient hospitalization, partial hospitalization, intensive outpatient services as well as outpatient referrals as appropriate.

ADULT PSYCHIATRIC SERVICES

Our adult psychiatric services provide intense therapeutic, multi-disciplinary assessments, clinical interventions and treatment to stabilize those individuals in crisis. As the most intensive level of care, inpatient treatment is designed for patients with behavioral health problems that require admission to a hospital with 24 hour/day care.

ADOLESCENT SERVICES

Our team of adolescent specialists recognize and understand the unique needs of adolescent patients dealing with emotional and psychological issues. The program goal is to provide stabilization of immediate concerns within a safe and structured environment. The treatment is short-term with the primary focus being on the reduction of symptoms and improvement of functioning.

Passionate Healthcare; Compassionate People

NO COST ASSESSMENTS ARE AVAILABLE 24 HOURS A DAY

To learn more about our services or to make a referral, please call our trained licensed professionals anytime day or night. Clinical information is handled in a confidential manner.
