

Outpatient Services

ECT

Houston Behavioral Healthcare Hospital takes pride in providing the best continuum of care to all patients and families. Providing ECT services, PHP/IOP and any community referrals/resources.

Electroconvulsive Therapy

For patients with severe depression and other mental health disorders, Houston Behavioral Healthcare Hospital offers therapeutic treatment options for patients who have been unresponsive or resistant to prescription medication.

Commonly referred to as ECT, services are provided by experienced board certified psychiatrists and anesthesiologists, as well as specialty trained ECT nursing staff which helps provide a safe and comfortable environment for the procedure.

Outpatient Services

PHP/IOP,

Community Referrals

PHP/IOP

For patients who do not meet the criteria for inpatient care but are seeking more intense treatment PHP/IOP is something to consider.

Houston Behavioral Healthcare Hospital offers both programs as a continuum of care.

Partial Hospitalization Program also known as PHP includes medication management along side group therapy. Treatment is provided under the care of a psychiatry team, trained nurse, and licensed therapist.

Intensive Outpatient Program also known as IOP is designed to provide support mechanisms, help with relapse management and provide coping strategies all within a group therapy setting.

Houston Behavioral Healthcare Hospital also provides information about community referrals and resources.
